W16-P1: add w6 blogs data into index.html as blogs section

The screenshot shows the Visual Studio Code editor with the following files open:

- `index.html`: Contains the HTML structure for the blogs section. A red box highlights the `<div class="blogs">` section, and a pink box highlights the `<div class="blogs-center">` section. The code includes a section title, a CSS Grid container, and four article placeholders.
- `styles.69.scss`: Contains the SCSS styles for the blogs section. A red box highlights the `.blogs` selector, and a pink box highlights the `¢er` selector. The code includes a media query for screens with a minimum width of 992px.

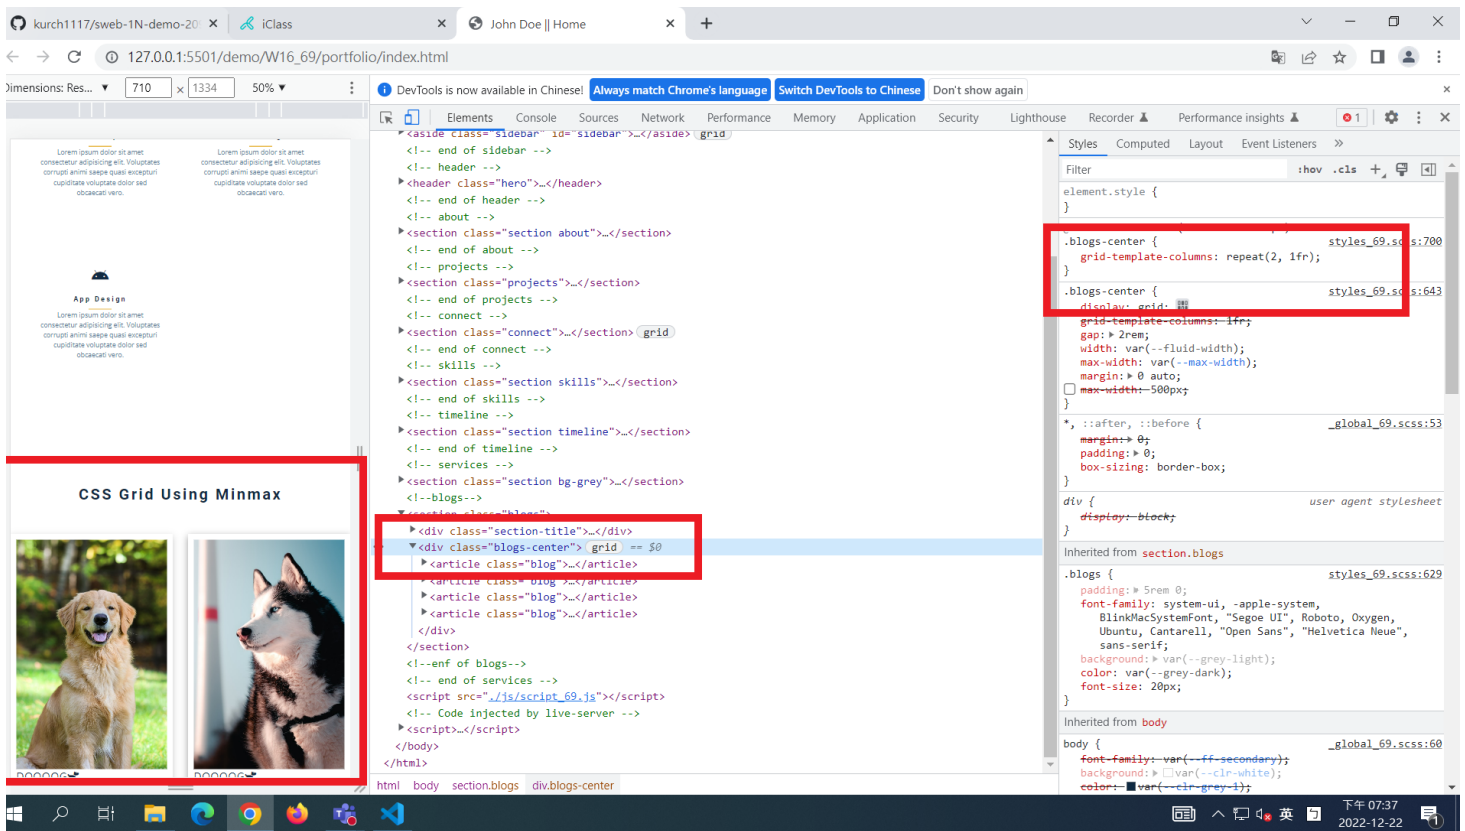

```
index.html
3
3 0 </div>
3 1 </section>
3 2 <!--blogs-->
3 3 <div class="blogs">
3 4 <div class="section-title">
3 5 <h2>CSS Grid using minmax</h2>
3 6 </div>
3 7 <div class="blogs-center">
3 8 <article class="blog">...
3 9 </article>
3 10 <article class="blog">...
3 11 </article>
3 12 <article class="blog">...
3 13 </article>
3 14 <article class="blog">...
3 15 </article>
3 16 </div>
3 17 <!--end of blogs-->
3 18 <!-- end of services -->
3 19 <script src="./js/script_69.js"></script>
3 20 </body>
3 21 </html>
```

```
styles.69.scss
624
625 .blogs
626 {
627   //
628 }
629
630 @media screen and (min-width: 450px){
631   .blogs {
632     &center {
633       grid-template-columns: repeat(2, 1fr);
634     }
635   }
636 }
637
638 @media screen and (min-width: 768px){
639   .blogs {
640     &center {grid-template-columns: repeat(3, 1fr);
641   }
642 }
643
644 @media screen and (min-width: 992px){
645   .blogs {
646     &center {grid-template-columns: repeat(4, 1fr);
647   }
648 }
```

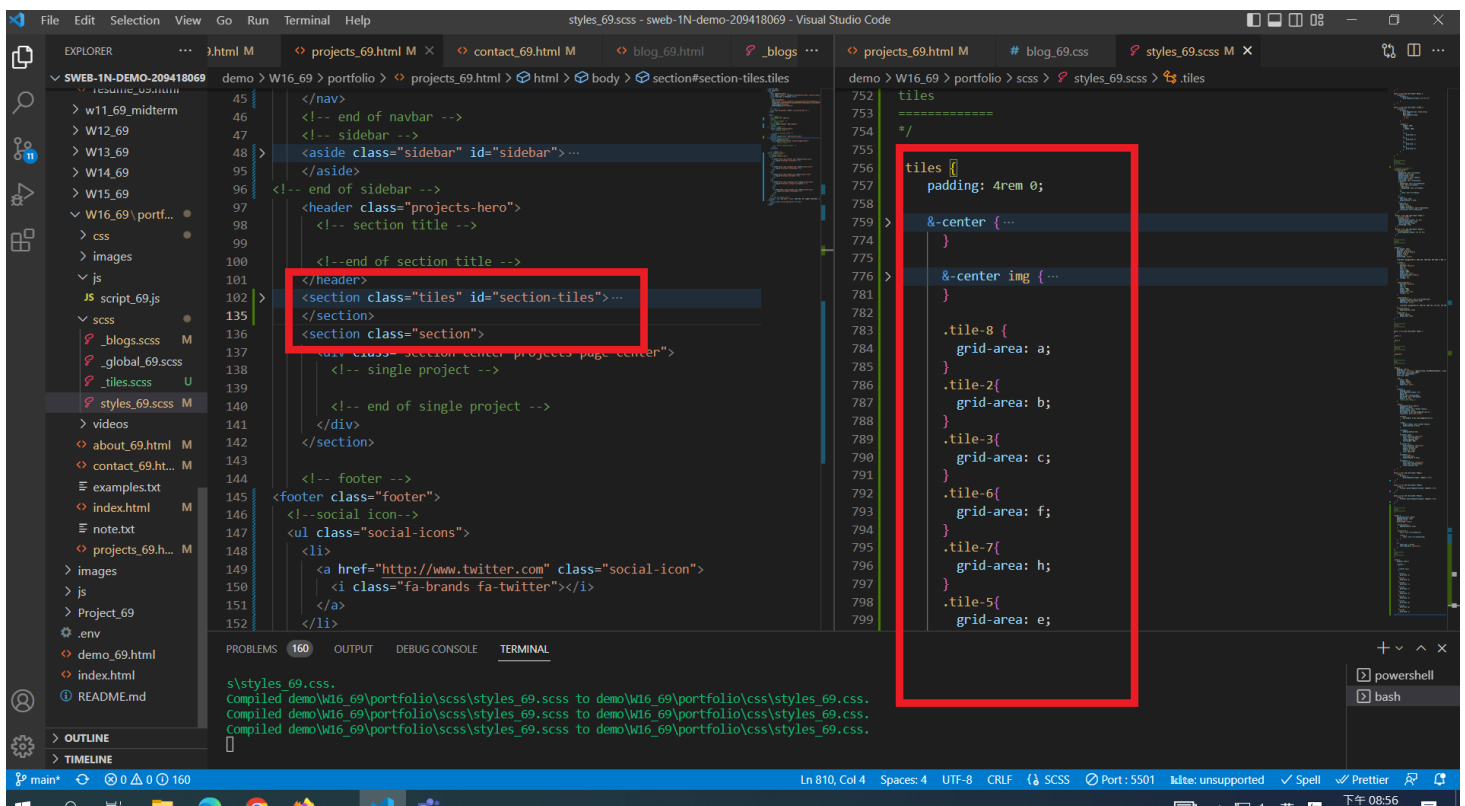

Terminal output:

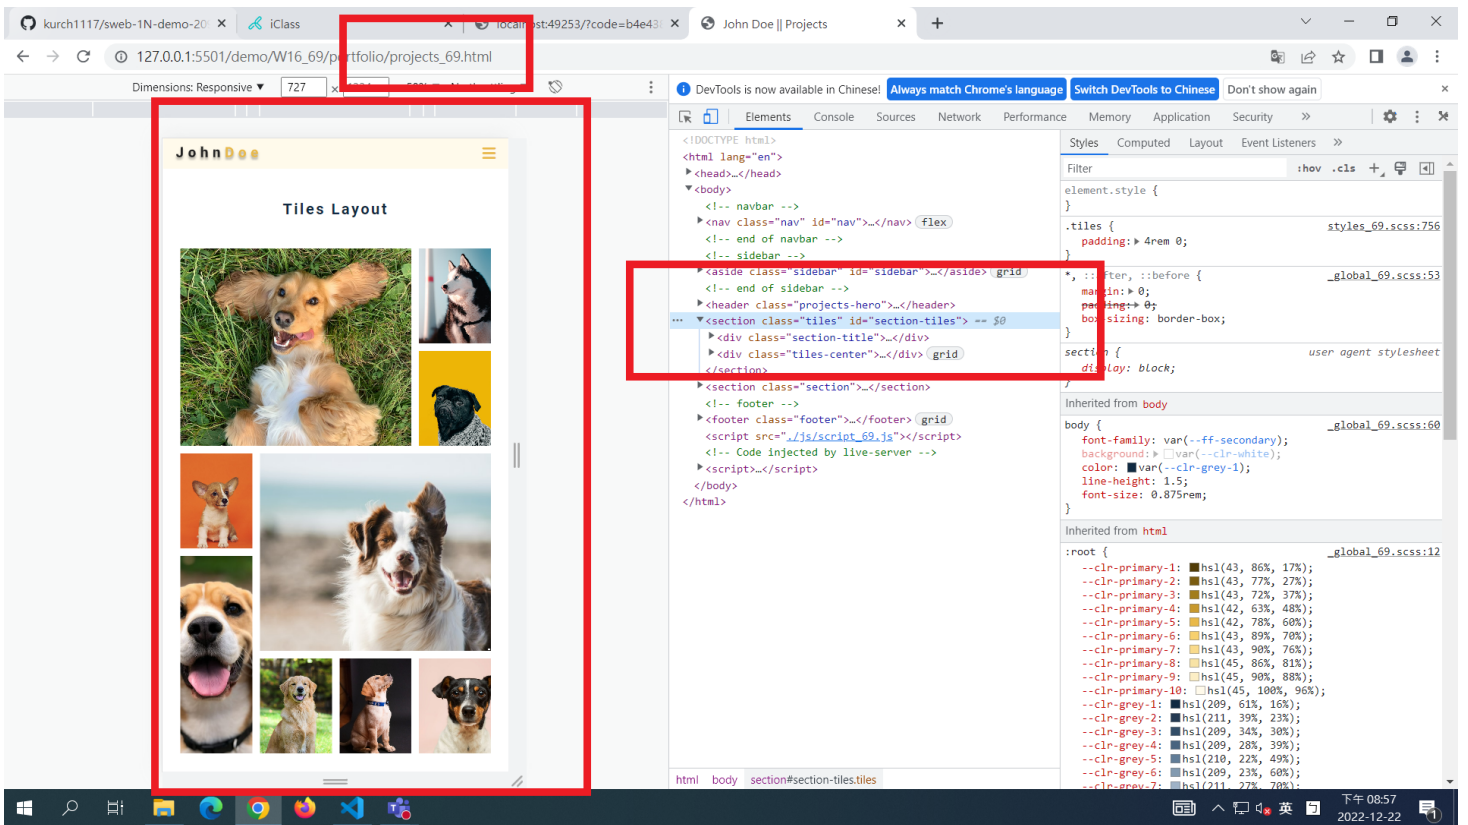

```
